INDESIT
We work, you play.

The new Indesit cooking

Collection 2010

INDESIT
We work, you play.

The Indesit brand is evolving. With continuous focus on product design, functionality, intelligence and style, Indesit appliances are growing up.
For this reason Indesit is one of the major brands across Europe. These products ease the pressures of modern life and take the hassle out of everyday chores.
Efficient, reliable, easy to use, and environmentally friendly these domestic appliances are full of innovative solutions that make your life easier.
Designing simple and smart appliances to create more time for life so you can enjoy the things you really love: this is Indesit's philosophy and something we will continue working towards, always.

4 Cookers Freestanding
34 Ovens and Microwave Built-in
46 Hobs Built-in
60 Hoods Built-in

Multichef 9

The Indesit 90 cm multifunction professional cookers offer 9 extremely versatiles programs. You have simply to choose between the programs of the Multichef 9 oven - Barbecue, Brioche, Tarts, Turnspit, Rising, Multicooking, Rotisserie, Defrosting, Traditional – and you'll get each type of food cooked at the best.

Multichef 7

This Multifunction electric cooker has seven extraordinarily versatile cooking programs that ensure perfect results. All the programs — Static, Pizza, Grill, Pastry, Multilevel Cooking, Ventilated Grill and the latest Quick Cook program — have been designed to achieve the most suitable cooking system for each type of food.

Quick cook

This mode is especially recommended for cooking pre-packed food quickly (pre-heating is not necessary), such as for example: frozen or pre-cooked food as well as for a few "home-made" dishes. The heating elements and the fan come on, guaranteeing constant heat distributed uniformly throughout the oven.

Multilevel Cooking

A specialized performance for multiple and homogeneous cooking: it allows cooking contemporarily on up to 3 levels of different dishes: starters, mains, vegetables or dessert all in one single bake, without mixing tastes and smells. All this thanks to the constantly moving of the airflow that allows the heat to be equally distributed.

Pastry

For all cakes and preparations that require delicate cooking. The heat comes from below, ensuring that doughs and mixes rise effectively and evenly.

Static Oven

Ideal for traditional cooking: the heat delicately envelops the dish for even cooking.

Pizza oven

This is the perfect program for crisp, fragrant pizzas as it distributes the high heat quite evenly.

Ventilated Grill

Combines the speed of the grill with the uniform heat distribution of the ventilated oven.

Grill

This is perfect for making toast and for grilling meats and fish quickly, saving time and energy.

Multichef 5

This Multifunction electric cooker has five programs — Static, Grill, Ventilated Oven, Double Grill and Ventilated Grill — designed to cook each type of food in exactly the right way. Moreover, the new Easy Defrost function lets you defrost any type of food in half the time normally required.

Easy Defrost

Thanks to this function the time to defrost the food is reduced (- 50% vs the fridge defrosting) and is suggested for all the fresh food that has been frozen (fruits and vegetables) and for the food that has been cooked (pizza and meat defrost in half of the normal time). (Only in the Electric Multichef 5 Oven).

Ventilated oven

This lets you cook several foods at the same time, particularly roasts and au gratin baked pasta or rice dishes.

Double Grill

Excellent for grilling quantities of meat or for browning foods quickly.

A

Indesit kitchens with A energy Class provide excellent performances with low energy consumption. A Class is the highest European award that marks performance effectiveness vis-à-vis reduced consumption.

Multi zone

The new Multi zone grid permits with the special accessory pyrex pot to defrost or keep warm your food while you are cooking without using a burner.

multi zone

Double and Triple crown Burners

The double & triple ring burners have been created from a new concept, to allow the distribution of the heat over a bigger surface, ensuring a faster and homogeneous cooking. Both ideal for cooking with the wok.

Ultra Rapid Burner

This burner has greater power and produces an even more intense heat, thus saving up to 10% on cooking time.

Electronic Ignition

This practical system makes igniting the burners easier. In some models, with one hand ignition, you can turn on the burner with one simple gesture.

GAS

Safe Flame

È uno speciale dispositivo che blocca la fuoriuscita di gas in caso di spegnimento accidentale della fiamma.

Model	Colour	Code

Indesit reserves itself to bring changes to the products technical without notice.

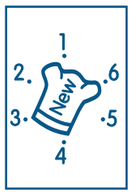
Not just beautiful, but also easy to use!

The new Indesit ovens have been created to satisfy all your functional and furnishing needs. Perfectly coordinable with the new trends in design, they offer practical solutions and cooking features.

Multichef oven (7 programmes)

Created to help you in the preparation of your dishes, from the simplest to the most elaborate, the electric multifunction oven with its seven programmes – static, pizza, grill, vented grill, pastries, multilevel and quick cooking – guarantees a perfect success on all recipes.



Multichef oven (6 programmes)

The electric multifunction oven allows an extraordinary versatility in the preparation of any recipe. With six programmes – static, pizza, grill, vented grill, pastries, multilevel - you will be able to choose the most suitable cooking system for every food.

A

High performance with low consumption, significant energy savings and a strong focus on the environment, these are the main features of Indesit's new ovens. Crucial technological innovation and the use of high quality materials have enabled these products to obtain the A class, the highest European award that grades performance effectiveness in relation to reduced consumption.

Display

In order to help you to save time without having to renounce to your favourite dishes, Indesit proposes an easy and practical display. You can thus programme in advance the length and the end of the cooking time, and at the end the oven will turn off by itself, informing you with an acoustic signal that everything is ready. But that's not all: the programmer is also a perfect watch.

Design

The new ovens have been designed to allow an easy coordination. But they're not just beautiful: they're also strong, solid and functional, thanks to the new monoblock structure and to the new cooking programmes. Moreover, in the models with display the oven's handle is metallic. The design of the handle and of the knobs is new, and they are coordinated with the new hobs design. Everything has been thought to make everyday life easier and more fun.

Quick clean

Today, even the oven's cleaning is easier and faster. The inside of the oven is, in fact, covered with a special polish that allows you to clean the oven with less fatigue.

Microwaves

The new Indesit microwave provides a wide range of cooking and defrosting programs to meet all your different needs. It is possible to combine microwave and grill functions to make food cook faster than traditional ovens. The grill program is the ideal solution for cooking meat. It is activated immediately after the microwave cooking program, it makes food crispy. Programming is really easy and user-friendly thanks to the pre-set up programs dedicated to the cooking and defrosting of different food types. Program activation is automatic and you only need to select the program corresponding to the dish you choose to cook or defrost and set the weight: the oven will automatically set up in accordance with the duration of the cooking or defrosting.

Indesit reserves itself to bring changes to the products technical without notice.

New design and great spaces.

The new hob collection has been designed to satisfy functional and aesthetic needs. Characterized by simple and essential lines, the new hobs can be coordinated with all the other Indesit household appliances, and they can fit perfectly in any young and modern kitchen.

70 cm of width

The greatest Indesit novelty is the 70 cm hob, that offers up to 10 cm more of cooking space. Everything in these hobs has been thought to make life easier and safer, such as the position of the burners, the gas security and the one hand electronic ignition. But the news is that they can be inserted in a standard 60 cm cut out, so that you can change the hob without having to modify the top of your kitchen.

Grills

Indesit has renewed the design of the grills, to make them more secure and stable. Easy to remove to allow a quick cleaning of the hob, they are quick to wash, even in a dishwasher.

Knobs

Knobs have been re-designed to guarantee a more ergonomic handling and to make the regulation of the flame easier. The new knobs, realized in a heat resistant material to offer a greater resistance to heat and to last in time, can be coordinated with ovens.

Special Gas Burners

The models that enable faster cooking come with special burners (double crown or triple crown). Heat is uniformly distributed on a wider surface by two or three crowns. The availability of different crown types on the same gas hob ensures maximum flexibility and gives you the best solution that fits every kind of cooker.

Electronic Ignition

An Electronic Ignition system enables some hob models to be used more easily. With the one-hand electronic ignition, it requires only one simple move.

Safe Flame

In all gas hobs, a special device cuts off gas leakage in case the flame is extinguished accidentally.

Indesit reserves itself to bring changes to the products technical without notice.

Odourless kitchen.

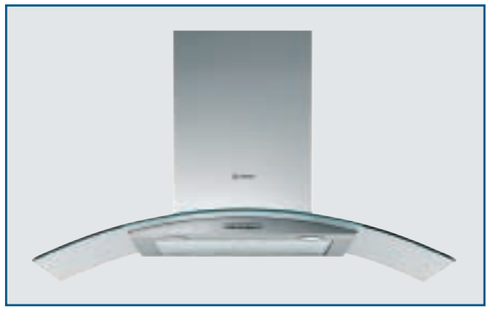
Hoods have an important function in a kitchen, they remove bad and greasy smells, but are also part of the home décor. Indesit offers a variety of models to suit different décor styles.

Lighting

New incandescent low energy consumption lamps and sophisticated halogen spotlights light the hob in the best way, creating a pleasant and warm atmosphere.

Metallic filters

Metallic inox filters are a real innovation in increasing effectiveness and saving time: they are easy to fix, washable in the dish washer. The filter helps to maintain the cleanliness of the hoods, keeping the greasy particles out.



Model	Colour	Code
H 991 IX	stainless steel	57446

- **90 cm hood**
- Extraction capacity: 400 m³/h
- 3 speeds
- Mechanical controls
- 1 self supporting metallic filter
- 2 halogen lamps x 20 W

Description		H 161.2 (BK)	H 161.2 IX	H 161.2 (WH)	H 461 IX
Code		57780	57778	57779	56474
Colour		Black	Stainless Steel	White	Stainless Steel
Hood Material		Steel	Stainless Steel	Steel	Stainless Steel
Type of control		Mechanical	Mechanical	Mechanical	Mechanical
Type of control device		Slider	Slider	Slider	Slider
No.filters		1	1	1	1
Filter Type		Synthetic	Synthetic	Synthetic	Aluminium Selfsupporting
Filter Washable in Dishwasher		•	•	•	•
Speed		3	3	3	3
Lights		2 Std x 40 Watt	2 Std x 40 Watt	2 Std x 40 Watt	2 Std x 40 Watt
Light adjustment		On/Off	On/Off	On/Off	On/Off
Supply Voltage	(V)	220-240	220-240	220-240	220-240
Supply Frequency	(Hz)	50/60	50/60	50/60, 60	50/60
Absorbed Power	(W)	200	200	200	200
Output Air Extraction	(m^3/h)	250	250	250	330
IEC extraction	(m^3/h)	230	230	230	290
Diameter of Air Outlet	(mm)	125	125	125	120
Sound Level minimum speed		49		49	53
Sound Level maximum speed	(dB(A))	60	60	60	64
Height	(cm)	13.23	13.23	13.23	17
Width	(cm)	59.9	59.9	59.9	60
Depth	(cm)	50.95	50.95	50.95	28
